

ifb BAMI makes it simple for you

BW/4HANA Automated Metadata Integration for SAP PowerDesigner

BAMI is the result of ifb's vast experience and competence in the fields of transformation and modern IT-Solutions. The approach allows you to automatically extract metadata from your SAP BW/4HANA into SAP PowerDesigner, saving time, eliminating errors and providing insight into your organization's data flows and processes.

KEY BENEFITS

- › Avoid manual data model creation which is time-consuming, error-prone and tedious.
- › Save time and money by integrating your BW/4HANA metadata automatically in SAP PowerDesigner.
- › Document and visualize your BW/4HANA dataflow in SAP PowerDesigner with just a few clicks.
- › Profit from our experience in SAP BW/4HANA and SAP PowerDesigner.
- › Influence the development of further enhancements in the future.
- › We accompany and support you during the complete setup from installation to test and go-live.

KEY FEATURES

- › Create and update your data model in SAP PowerDesigner via an RFC connection to BW/4HANA.
- › Keep track of the pathway of your data through the system through data lineage.
- › Conduct impact analyses in preparation to data model changes.
- › Compare the actual data model with your target data model and perform a fit-gap analysis.
