

Apply your knowledge and your engagement as an

Enterprise or Business Architect (f/m)

Outstanding analytical, conceptual and communication skills

combined with a high degree of personal initiative, team orientation and flexibility as well as fluent business English and German will qualify you for a position within our dynamic, fast growing and open-minded company. You have a university degree and at least five years of professional experience in the financial services industry as a consultant or in a line management function and have also acquired extensive and well-rounded know-how in the areas of Enterprise Architecture or Business Architecture, e.g. in design and visualization of data models or application landscapes and applying architectural principles to business solutions? Additional experience in modeling business processes or specific business knowledge (e.g. target operating model, rationalization of heterogeneous data or application landscapes) in the financial industry using a variety of tools and techniques will be of advantage.

Seize your opportunity!

Our collaborative and innovative company culture provides the ideal framework for your professional and personal development. As an Enterprise/Business Architect you will play a key role in supporting our international customers in terms of their governance structure, business processes, data models, application landscape and urgent business needs. You will be responsible for:

- Developing enterprise and business architecture strategies based on various business scenarios and current challenges of the financial industry
- Applying a structured approach and methodology for capturing the key views of the enterprise (data, process, applications)
- Aligning strategic goals with decisions regarding products and services, partners, suppliers and more
- Defining and analyzing primary business functions and developing the set of strategic, core and support processes that transcend functional and organizational boundaries
- Working with business analyst and process analyst to develop state-of-the-art concepts
- Capturing the relationships among roles and responsibilities, capabilities and business units, and the decomposition of those into sub-units

We are searching for new colleagues

who are excited by the idea of working on European and international projects and value frequent travelling across Europe or worldwide. Typical project engagements require on-site engagement and thus frequent travel to the client site and last usually between six and twelve months.

Sounds interesting? It sure is!

For further information, please contact Dr. Claudia Kröll by telephone +49 (0)221 92 18 41-285. Please send your application documents including your salary expectation and your possible entry date to Recruiting@ifb-group.com.
