

We are looking for multiple new colleagues to join our team based in Grünwald (Munich) working as

## S/4HANA Financial Analyst/Developer (f/m/d)

Are you currently a **SAP BW Analyst/Developer** (f/m/d) looking for that next career change to kick-start your career with a “step change” into the world of **S/4 HANA**?

Outstanding analytical, communication and problem-solving skills combined with a high degree of self-motivation, flexibility and thirst for career and personal growth based on solid SAP BW experiences will qualify you for a position within our international, dynamic, fast growing and open-minded company. Is this your current skillset?

- At least three years of SAP BW Developer experience and/or Production BW Sustainment/Operations experience
- a desire of learn and become a S/4HANA Expert
- Proven experience as a BW Developer with an understanding of SAP's BW Framework
- Understand BW Best Practices for data warehousing design, analytics and reporting
- Minimum one hands-on full project life cycle experience as a SAP BW project team member
- Intermediate understanding of Data Governance and Master Data Management principles
- Any exposure to HANA Modelling and/or BW/4 HANA is considered a bonus!
- SAP Certification, ITIL, TOGAF and/or Data Warehousing designations is a very nice to have
- Bachelor's Degree in Computer Science or related fields and/or five years equivalent IT experiences required
- English as your native or second (E2L) language is required

### Seize your opportunity!

As an experienced SAP BW Analyst/Developer, you are seeking the opportunity to **move into S/4 HANA**. Our SAP Partner Company has a culture which will provide the ideal framework for your professional and personal development.

We need to expand our AMS (Application Management Services) team responsible for our S/4 HANA FPSL (Financial Product Subledger) Banking and Insurance customers. For this AMS/Operations job opportunity we will provide training and experiences supporting our Banking and Insurance clients with their transformational project based journeys and productive use of S/4 HANA.

You will also gain exposure to the latest S/4 FPSL related FIORI Apps, HANA View Development and SAP Analytics Cloud (SAC) Query/Reporting capabilities. Successful candidates will initially work from our office in Germany but after 12-18 months, there may be opportunities to work on temporary International on-site assignments.

### Sounds interesting? It sure is!
